National Baby Facts

- National entries into foster care
 - 31% <3 years old (FY 2009)
- National abuse deaths
 - 79.8% <3 years old (FY 2008)
- Approximately half (35-68%) have developmental delays or disabilities.

Slide 5

Infants and Foster Care

Fiscal Year 2008

- 22% of new admissions
- Four times more likely to enter care
- More time in out-of-home care
 - 60% spent most of their time in foster care
- Longer stays
 - Longest for entries in 0-3 months

Wulczyn, F, Chen, L, Collins, L & Ernst, M (2011) [Zero to Three](#). (31:3)

Slide 6

Reunifications and Disparities

- Infants & adolescents reunify more slowly
(Harris & Courtney, 2003)
 - Higher % infants in care => lower regional reunification rates
(WSIPP, 2004)
 - Nearly 1 in 3 reenter care
(Wulczyn et al, 2011)
- The disparity between black and white admissions is greatest in infancy.
(Wulczyn et al, 2011)

Neglect Can Be Toxic

Neglect in the first two years of life specifically predicted aggression at 4, 6, and 8. Early abuse, later abuse and later neglect did not.

Early Relationships Are Important !!!

"Each achievement – language and learning, social development, the emergence of self-regulation – occurs in the context of close relationships with others."

- *From Neurons to Neighborhoods, National Academy of Science, 2000*

Slide 11

The Attachment System

- "A healthy, secure attachment generally means the child has been supported in:
 - learning coping skills,
 - helped to adapt to changes
 - learned to contain and soothe distress,
 - and learned to self-regulate their emotions and behaviors."

Helping Families = Repairing Relationships

"The bottom line is that child welfare practices that are largely focused on child safety often are not structured to promote healthy development and the formation of a secure attachment."
